Data LifeLine

MAKING IT WORK FOR YOU

Let LAN Systems help you reduce the cost and hassle of your traditional backup solution. With **Data LifeLine** you can rest assured that your data is HIPAA compliant, secure and available to you anytime – anywhere.

KEY FEATURES

- Detects new or changed files and backs up daily
- Web interface to easily review and restore files
- Bandwidth throttle keeps you at peak performance
- Only pay for what you need. Backup as much or as little as you like

Flexible storage solutions for your business needs

It is an ongoing challenge to protect your critical data. Most providers could not survive the complete loss of data and a partial loss could still leave you stranded. You need a reliable disaster recovery plan. And as data size increases, it becomes more essential to have an easy and reliable way to back-up your data so that you can restore anything from an entire server to a single file.

THE PROBLEM

There are dangers to your data everywhere – hardware, software, users, and the environment. With so many risks, even your best data recovery plan needs reviewed. Ever had a user delete a single file? As you know, it can take hours of your time to find and restore it. Help is here!

THE SOLUTION

LAN Systems has a plan to help you backup your critical data for disaster recovery and provide easy access to your files when you need them. **Data LifeLine** provides two levels of protection – disaster recovery and file restoration. You'll never have to worry about data recovery again.

CUSTOM SOLUTIONS

Data LifeLine provides a customized backup solution that is affordable, secure and integrates seamlessly into your current environment.

SECURITY

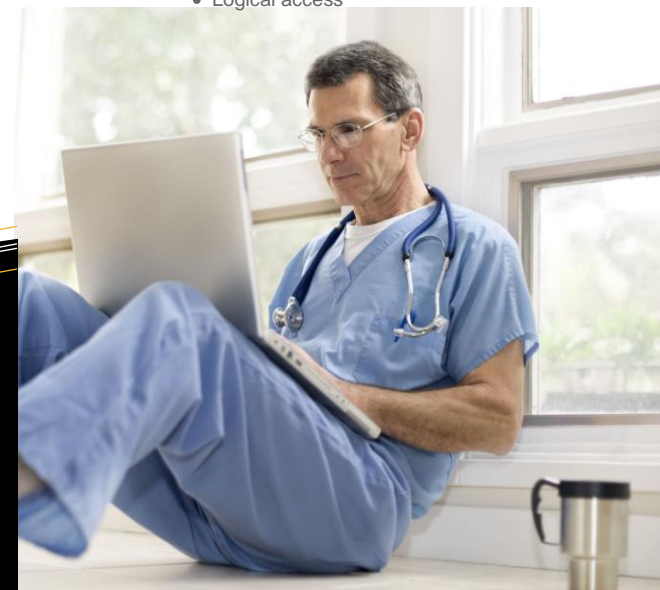

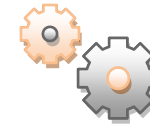

With our 128-bit transfer and 448-bit Blowfish storage encryption you can sleep easy knowing your data is always secure during transfer and storage.

DATA AT YOUR FINGERTIPS

With our easy-to-use web interface your data is always at your fingertips. You can easily retrieve your files anytime and anywhere that you have an internet connection.

HIPAA COMPLIANCE

- Encryption of data during backup
- Encryption of data on backup servers
- Physical security
- Remote/offsite backup
- Private and public encryption keys
- Logical access

MAKING IT WORK FOR YOU
